

André Monteiro

Data Engineer | Python & SQL | ETL & Integrations

📍 Lisbon, Portugal • ✉ andrefbmonteiro@gmail.com • ☎ 914 045 220 • 🔗 andrefbmonteiro • 🌐 AndreFBM

About

Data Engineer with a practical focus on integrations, ETL pipelines, and automations that turn unreliable data into something consistent and useful. My main tools are Python, SQL, and JavaScript, with a strong focus on APIs and data flows. I tend to own the full picture, from how data gets in to whether the output is actually correct.

Experience

Ask-to-Print

Data Engineer

Lisbon, Portugal (Hybrid)

Dec 2024 – present

- Own end-to-end technical execution: integrations, automation, website changes, and operational tooling.
- Build and maintain integrations to fetch/sync partner data (APIs/FTP).
- Develop Python pipelines for data extraction, transformation, and operational updates, eliminating recurring manual processes.
- Design and implement pricing and operational rule updates across 5+ systems, ensuring consistency across operational data.
- Coordinate website feature delivery with external developers: requirements, implementation review, and release QA.

BIZAY

Data Analyst

Portugal (Remote)

Oct 2022 – Nov 2024

- Built and maintained 20+ ETL pipelines into SQL Server with validation rules and data quality checks.
- Improved SQL Server performance and reliability through query optimisation and data model refinements.
- Developed Python automations for data extraction (APIs/FTP/web scraping) and automated operational updates.
- Led technical data integrations with 15+ partners, translating business requirements into reliable data flows.

G2 Esports

Social Media Specialist

Remote

Sept 2020 – Aug 2022

- Executed paid social campaigns (Twitter/Instagram) for Turkish & Brazilian markets, increasing engagement by 25%.
- Measured and optimised campaign performance with Twitter Analytics and Google Analytics, reporting results to stakeholders.

Fujitsu

Junior Data Analyst

Lisbon, Portugal

July 2018 – Aug 2020

- Built and maintained incident and alert reporting dashboards in Power BI and MySQL, delivering weekly SLA compliance and escalation trend reports to management.
- Identified recurring incident patterns and proposed preventative actions to reduce repeat escalations.

Education

Instituto Superior Técnico, MSc in Computer Science and Engineering

2017 - 2019

Instituto Superior Técnico, BSc in Computer Science and Engineering

2013 - 2017

Languages

Portuguese: Native or bilingual proficiency

English: Full professional proficiency
